Subjects might be changed without notice. No liability for misprints or errors.
© Miditemp GmbH 07_2008

1.

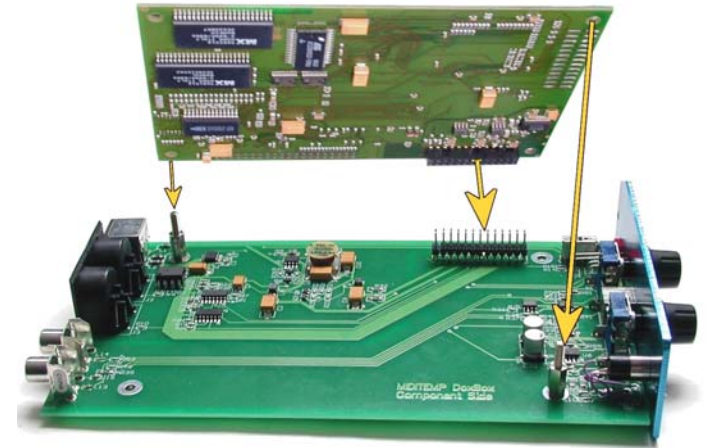

Please open the case by removing the 2 outer screws in the front of the case (see tag arrows)

2.

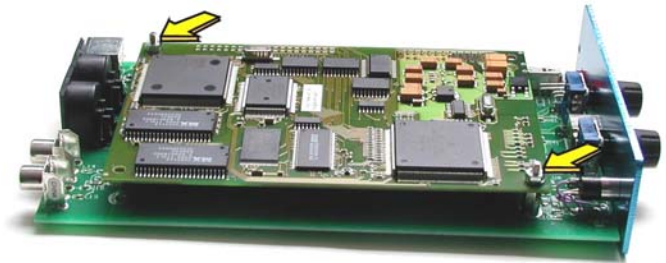

Pull out the draft with the electronics out of the

3.

Please ensure precise positioning of the daughterboard onto the connector to avoid damaging the pins when you fix the daughterboard.

4.

Fix the daughterboard with the 2 washers and nuts. **Don't tighten the nuts too hard, to avoid damaging the daughterboard!**

Afterwards push the board back into the case, attach the 2 front-panel screws- ready to go!
